Audit Trail	Access Activation Date	System timestamp	Conditional	Not manually entered.

/ Admin Portal

Developer Notes

Generate unique assignment reference when a consultant is proposed or assigned to a project. Suggested format: ORR-ASG-000001.

Assignment must be linked to an existing project.

Display for confirmation. Should link back to the project record.

Client should not be manually selected here. It should derive from the project.

Display for context, subject to confidentiality permissions.

The PM responsible for the project should be visible.

Options: Strategy Advisory & Compliance; Operational Systems & Infrastructure; Living Systems Regeneration. PM may amend before searching if project needs have evolved.

Pull from approved skill database. Should support cross-category skills.

Options: Consultant; Reviewer; Technical Implementer; Project Lead; Subject-Matter Expert.

Options: Working knowledge; Experienced; Advanced; Expert. This should match consultant skill proficiency where available.

Options should mirror consultant sector fields, e.g. Agriculture; IT / Software; Regulatory Affairs; Environment; Forestry; Construction; Finance; Import / Export; Immigration / Residency; Healthcare; Manufacturing; Food; Legal / Compliance; Other.

Options: English; Maltese; Italian; French; Spanish; Other. Match against consultant language profile.

Options: Remote; On-site; Hybrid. Match against consultant work mode and geographic coverage.

Useful for on-site work or jurisdiction-specific advisory.

Should use consultant availability field.

Only approved consultants should be available for assignment. Pending, suspended, rejected, or archived consultants must not appear.

Should use declared conflicts and project-specific conflict declarations once available.

For Restricted Access or Highly Confidential projects, only consultants with appropriate admin clearance should be selectable.

System should rank consultants using specialization, skills, proficiency, sector experience, languages, availability, location, previous performance, and conflicts.

Suggested labels: Strong Match; Good Match; Partial Match; Manual Review. Avoid over-reliance on exact percentages if data is incomplete.

Example: “Matches required skill: Regulatory compliance; language: Italian; sector: Agriculture; available: Yes.”

Show only relevant fields: Consultant ID, name, specialization, skills, proficiency, languages, availability, sector experience, work mode, admin rating.

PM/Admin should be able to override AI suggestions, but only from approved consultants.

Options: Consultant; Reviewer; Technical Implementer; Project Lead; Subject-Matter Expert.

Must be specific. This becomes the consultant-facing assignment brief.

Options: Notes; Technical Opinion; Report Section; Review Comments; Implementation Work; Meeting Attendance; Data Review; Client-Facing Deliverable; Other.

Useful for budget control and consultant workload.

Should be earlier than internal review/client delivery deadline.

Options: Normal; Priority; Urgent; Critical.

Options: No Access Yet; Assignment Brief Only; Selected Documents Only; Full Project Workspace; Restricted Custom Access.

Required if access level is “Selected Documents Only” or “Restricted Custom Access”. Default should be least-privilege access.

Options: Hidden / anonymised; Business name only; Full client profile. Useful for sensitive matters.

Options: No direct contact; PM-supervised contact only; Direct portal messaging allowed; Meeting attendance allowed. Default should be no direct contact unless PM/admin permits.

Recommended default: Yes. Consultant must complete declaration before project material is released.

Strongly recommended for Confidential, Highly Confidential, and Restricted Access projects.

If consultant rates are stored, visibility should be admin-only unless ORR allows PM visibility.

Useful for internal project costing.

Options: Hourly; Fixed assignment; Included in retainer; Internal review only; To be confirmed.

Consultant should receive assignment summary but not sensitive documents until conflict/confidentiality steps are completed.

Should include assignment scope, expected output, deadline, access conditions, and acceptance requirement.

Consultant must accept before being marked as assigned.

Should notify PM.

Record date/time of acceptance for audit.

PM or Admin confirms assignment after consultant accepts and completes required declarations.

Assignment status should control permissions and visibility.

Store PM/admin user ID.

Auto-record on creation.

Auto-update whenever assignment is modified.

Record when consultant access is activated.
