

ORR Project Creation Form — PM

Section	Field	Field Type	Required ?	Display Text / Options
System Linkage	Project ID	Auto-generated system field	Yes	Not manually entered.
System Linkage	Client ID	Auto-filled system field	Yes	Auto-filled from assigned client profile.
System Linkage	Client Name / Business Name	Auto-filled system field	Yes	Auto-filled from client profile.
System Linkage	Assigned PM	Auto-filled system field	Yes	Auto-filled from logged-in PM account.
Project Basics	Project Title	Text field	Yes	Enter a short project title.
Project Basics	Project Summary	Long text field	Yes	Briefly describe the client's issue, objective, or requested outcome.
Project Basics	ORR Service Category	Single-select	Yes	Select the primary ORR service category for this project.
Project Basics	Secondary Service Category	Multi-select	No	Select any additional ORR service categories involved in this project.
Project Classification	Project Type	Single-select	Yes	Select the type of project being created.
Project Classification	Project Complexity	Single-select	Recommended	Select the expected complexity level.

Project Classification	Confidentiality Level	Single-select	Yes	Select the confidentiality level for this project.
Project Classification	Urgency	Single-select	Recommended	Select the urgency level.
Scope	Client Objective	Long text field	Yes	What does the client want to achieve?
Scope	Main Problem / Question	Long text field	Yes	What is the main problem, question, or decision ORR is being asked to address?
Scope	Proposed Scope of Work	Long text field	Yes	Define what ORR will review, analyse, prepare, implement, or advise on.
Scope	Out of Scope	Long text field	Recommended	List anything that is specifically excluded from this project.
Scope	Expected Deliverable	Multi-select	Yes	Select the expected deliverable type.
Scope	Deliverable Description	Long text field	Recommended	Describe the expected deliverable in more detail.
Timeline	Target Start Date	Date field	Recommended	Select the expected project start date.
Timeline	Target Deadline	Date field	Recommended	Select the target completion date.
Timeline	Internal Review Deadline	Date field	Recommended	Select the date by which the PM/admin review should be completed.
Timeline	Client Delivery Deadline	Date field	Recommended	Select the date by which the client expects the deliverable.
Resources	Number of Consultants Required	Number field	Yes	Enter the expected number of consultants required.
Resources	Required Consultant Expertise	Multi-select searchable field	Recommended	Select the expertise required for this project.
Resources	Suggested Consultants	Multi-select searchable field	No	Select any consultants you would like to consider for this project.
Resources	Required Languages	Multi-select	Recommended	Select working languages required for this project.

Resources	Work Mode Required	Single / multi-select	Recommended	Select how the work is expected to be performed.
Documents	Linked Client Documents	File selector / vault link	No	Select client documents relevant to this project.
Documents	PM Uploads	File upload	No	Upload any additional notes or documents relevant to this project. Add internal notes for ORR only.
PM Notes	Internal PM Notes	Long text field	No	These notes are not visible to the client.
PM Notes	Client-Facing Notes	Long text field	No	Add notes that may be shared with the client if required.
Commercial	Estimated Hours	Number field	Recommended	Enter estimated ORR working hours.
Commercial	Estimated Budget / Value	Number + currency field	Optional	Enter expected project value, if known.
Commercial	Billing Type	Single-select	Recommended	Select billing model.
Commercial	Payment Status	System / dropdown	Recommended	Select or confirm payment status.
Client Communication	Client Approval Needed Before Starting	Toggle	Recommended	Does the client need to approve this project scope before work starts? Yes / No.
Client Communication	Send Project Summary to Client	Toggle	Optional	Send a project summary to the client for confirmation. Draft; Awaiting Client Confirmation; Awaiting Payment; Ready for Consultant Matching; Consultant Assignment Pending; Active; Internal Review; Delivered; Closed; On Hold; Cancelled.
Status	Project Status	System / dropdown	Yes	Consultant Assignment Pending; Active; Internal Review; Delivered; Closed; On Hold; Cancelled.
Submission	Save as Draft	Button	Yes	Save draft.
Submission	Submit for Admin Review	Button	Recommended	Submit project for ORR admin review.
Submission	Create Project	Button	Yes	Create project.

1 Portal

Developer Notes

Generate once the PM creates the project. Suggested format: ORR-PROJ-000001. This is the permanent internal project reference.

The PM should not manually type this. Project must be linked to an existing approved client.

Display for confirmation. Should link back to the client profile.

The project should default to the PM creating it, unless Super Admin allows reassignment.

Example: “Italian Market Entry Review”, “CRM Workflow Setup”, “Olive Grove Regeneration Plan”.

The AI should generate the initial project summary from the client profile, client request/brief, PM-client discussion notes, linked documents, and any PM notes entered before project creation. The PM must be able to edit and approve the text before submission. After the project is created, the system should prompt the PM to review the project summary for possible amendment whenever material new input is added, including new client messages, PM notes, uploaded documents, consultant notes, task updates, sub-task outcomes, deliverables, or changes in scope. Store the original AI-generated summary, the PM-approved version, and a version history of later amendments.

Options: Strategy Advisory & Compliance; Operational Systems & Infrastructure; Living Systems Regeneration.

Optional. Useful for cross-functional projects. Do not allow duplicate of primary category.

Options: Initial Advisory; Diagnostic Review; Report / Written Opinion; Implementation Support; Compliance Support; Operational Setup; Retainer Workstream; Technical Review; Other.

Options: Low; Medium; High; Specialist / Multi-disciplinary. Useful for consultant matching and pricing.

Options: Standard; Confidential; Highly Confidential; Restricted Access. This should control access permissions and document visibility.

Options: Normal; Priority; Urgent; Critical.

PM should write this in practical terms, not legalistic wording.

This is the core project question. Should be clear enough for consultants to understand the assignment.

This becomes the internal working scope.

Useful to avoid client misunderstanding and scope creep.

Options: Meeting Summary; Advisory Note; Written Report; Compliance Review; Technical Specification; Implementation Plan; Project Roadmap; Risk Assessment; Document Review; Client Presentation; Other.

Example: “A short written report identifying regulatory gaps and recommended next steps.”

Defaults to today or next available date.

Should be visible to assigned consultants.

Should be before client delivery deadline.

Can be same as target deadline if no distinction is needed.

Useful for team-based projects.

Pull options from approved consultant skills database. This supports matching.

PM may suggest consultants, but final assignment may require admin approval depending on workflow.

Options should mirror consultant language fields: English; Maltese; Italian; French; Spanish; Other.

Options: Remote; On-site; Hybrid.

PM should be able to link documents already uploaded by the client in the client vault.

These may include call notes, screenshots, draft briefs, or internal working documents.

Should be visible to Admin and assigned PM only unless permission is expanded.

Keep separate from internal notes.

Useful for pricing, workload, and consultant allocation.

Admin-only or PM/admin visibility recommended.

Options: First Report; Fixed Fee; Hourly; Retainer; Included in Existing Retainer; To Be Confirmed.

Options: Not Required Yet; Pending Payment; Paid; Included in Retainer; Admin Confirmation Required.

If Yes, project should remain in “Draft Scope / Awaiting Client Approval” status.

If enabled, system should generate a client-facing summary excluding internal notes and consultant information.

Status should drive portal visibility and workflow permissions.

PM can return later and continue editing.

Recommended before consultant assignment, especially where budget, confidentiality, or payment approval is needed.

Creates the project record and makes it visible according to its status and permissions.
