

ORR Task / Sub-Task Creation Form —]

Purpose

The Task / Sub-Task Creation Form allows the PM to break an ORR project into specific units of work. Each project may contain multiple tasks, which may be assigned to the PM, Admin, one or more consultants, or kept as internal ORR actions.

The form should support project management, consultant allocation, deadlines, document access, deliverable tracking, internal review

Section	Field / Function	Field Type	Required?	Display Text / Options

PM Portal

ole tasks, and each task may contain multiple sub-tasks. Tasks

/, and live project-summary updates.

Developer Notes

Generate unique task reference. Suggested format: ORR-TASK-000001.

Task must be linked to an existing project.

Client ID should derive from the project. Do not allow manual client selection.

Leave blank if this is a main task. If selected, this record becomes a sub-task.

Store PM/Admin/consultant user ID depending on permission level.

Auto-record creation time.

Example: “Review uploaded compliance documents”, “Prepare draft advisory note”, “Assess consultant responses”.

Options: PM Action; Admin Action; Consultant Work; Client Follow-up; Document Review; Research; Technical Analysis; Drafting; Internal Review; Client Deliverable; Meeting; Other.

Should be clear enough for the assigned person to act without needing unnecessary clarification.

Useful for distinguishing activity from outcome.

Options: Note; Comment; File upload; Report section; Review decision; Client message; Meeting outcome; Technical recommendation; Completed checklist; Other.

Options: Main Task; Sub-Task. If Sub-Task, require Parent Task ID.

Optional. Can be added later if milestones are implemented.

Useful where one task cannot start before another is completed.

Options should include assigned PM, Admin users, and consultants already activated for the project.

Options: PM; Admin; Consultant; Reviewer; Client; System / AI-assisted.
Allows more than one person to contribute while keeping one accountable owner.

If Yes, access must follow the project access-control rules.

If Yes, PM may need to send a client message or request documents.

Optional but useful for workload planning.

Should not exceed project deadline unless authorised.

Useful for consultant outputs requiring PM/Admin review before client release.

Options: Low; Normal; Priority; Urgent; Critical.

Access to selected documents should follow confidentiality and user permission settings.

Files should be saved against the task and linked to the project document record.

Options: PM/Admin only; Assigned consultant only; Project team; Client-visible; Restricted custom access.

Not visible to client. Visibility to consultants depends on access setting.

Keep separate from internal notes.

Required if task is assigned to consultant.

AI may help convert PM notes into structured task instructions. PM must review before saving.

After task creation or completion, system should prompt PM to decide whether project summary needs updating.

Useful for workload and budget tracking.

Can be added during completion or time reporting.

Options: Billable; Non-billable; Included in Retainer; Internal ORR; To Be Confirmed.

Status should drive notifications and dashboard visibility.

Required if status is Blocked.

Required when marking task as Completed.

Auto-record when status becomes Completed.

Default Yes for consultant tasks and client-facing outputs.

Recommended for high-confidentiality, commercial, legal, or sensitive tasks.

Used when PM/Admin reviews submitted task output.

Required if revision is requested or rejected.

Default Yes when task is assigned.

Default Yes.

Used for sensitive, blocked, overdue, or admin-review tasks.

Auto-update on any change.

Store user ID of last editor.

Preserve changes to task title, description, assignment, due date, status, access, and review outcome.
